

M6204 SERIES

DC/DC POWER SUPPLY

PRODUCT HIGHLIGHTS

- **MINIATURE**
- **HIGH DENSITY**
- **HIGH EFFICIENCY**
- **SINGLE OUTPUT**
- **DC/DC POWER SUPPLY**
- **UP TO 500 W**

Applications

Military (Airborne, ground-fix, shipboard), Ruggedized, Telecom, Industrial

Special Features

- Miniature size
- High efficiency
- Wide input range
- Input / Output isolation
- Remote sense
- External On/Off Inhibit
- Zero Voltage Switching Technology
- Fixed switching freq. (250 kHz)
- External synchronization capability
- EMI filters included
- Inrush circuit
- Indefinite short circuit protection with auto-recovery
- Over-voltage shutdown with auto-recovery
- Over temperature shutdown with auto-recovery

Electrical Specifications

DC Input

Voltage range: 220 to 380V_{DC}

Optional: 200 to 350V_{DC}

DC Output

Voltage range: 1.8 to 28V_{DC}

Current range: 0 to 50A

Power range: 0 to 350W

Short time peak up to 500W

Isolation

Input to Output: 500V_{DC}

Input to Case: 500V_{DC}

Output to Case: 100V_{DC}

Line/Load/Temp regulation

Up to $\pm 1\%$ (no load to full load, -55°C to $+85^{\circ}\text{C}$ and over input

voltage range).

Efficiency

Typical 88-90% - (nominal line, full load, room temperature)

EMC

Designed to meet MIL-STD-461F*

CE101, CE102, CS101, CS114, CS115, CS116, RE101, RE102, RS101, RS103

Ripple and Noise

Less than 50 mV_{p-p}, typical (max. 1%) without external capacitance. When connected to system capacitance ripple drops significantly.

Transient Over-and-undershoot

Output impedance at load change of 50% to 100% is 30 to 200m Ω (depending on output voltage).

Output returns to steady-state within 300 to 500 μs .

Turn-on Transient

No Voltage over shoot during Power on.

*EMC compliance achieved when tested with 5 μH LISNs, shielded harness and static resistive load.

Protections*

Input

- **Inrush Current Limiter**
Peak value of up to 5 times the maximum steady-state input current for inrush currents lasting over 50 μ s
- **Under-voltage Lock-out**
Unit protects itself (no damage) below 200V_{DC}**
- **Overvoltage protection**
Unit protects itself (no damage) above 380 V_{DC}**
Unit may be damaged if exposed to input voltages higher than 500V

Output

- **Electronic over-voltage protection**
Protects unit (no damage) 10%** above nominal voltage.
- **Passive transorb on outputs**
20%** above nominal voltage.
- **Current limiting**
Continuous protection (10-30% above maximum current) for unlimited time (Hiccup).

General

- **Over temperature protection** Shutdown at base plate temperature of +105°C*** Automatic recovery at base plate temperature lower than +95°C***

Environmental Conditions

Designed to Meet MIL-STD-810G

Temperature

Method 501.5 Procedures I & II
Method 502.5 Procedures I & II
Operating: -55°C to +85°C (baseplate)
Storage: -55°C to +125°C (ambient)

Altitude

Method 500.5
Procedures I & II
Up to 70000ft. Operational

Salt Fog:

Method 509.5

Humidity

Method 507.5
Up to 95% RH.

Vibration (Random)

Method 514.6
Random Vibration, Category 24, Fig 514.6E-1.

Shock

Method 516.6
30g, 11ms terminal peak saw-tooth (all directions)

Reliability

150,000 hours, calculated MIL-STD-217F Notice 2 at +85°C base plate, Ground fixed.

Environmental Stress Screening (ESS)

Including random vibration and thermal cycles is also available. **Please consult factory for details**

* Thresholds and protections can be modified / removed – please consult factory.

** Standard tolerance is $\pm 5\%$

*** Standard tolerance is $\pm 5^\circ\text{C}$

Functions and Signals

INHIBIT signal

The **INHIBIT** signal is used to turn the power supply ON and OFF.

TTL “1” or OPEN – will turn the power supply ON (For normal operation leave the signal not connected).

TTL “0” or short– will turn the power supply OFF. This signal is referenced to the **SIGNAL RTN** pin.

SYNC IN signal

The **SYNC IN** signal is used to allow the power supply frequency to sync with the system frequency. The system frequency should be $250 \text{ kHz} \pm 10 \text{ kHz}$.

When not connected the power supply will work at $250 \text{ kHz} \pm 10 \text{ kHz}$. This signal is referenced to the **SIGNAL RTN** pin.

SIGNAL RTN

The **SIGNAL RTN** pin is used as a return path for **SYNC IN** and **INHIBIT** signals. This pin is referenced to the **VIN RTN** pin.

SENSE 1

The **SENSE 1** is used to achieve accurate load regulation at output #1's load terminals. This is done by connecting the pins directly to the load terminals. The remote sense correction function is limited to voltage drop between converter's output and load terminals of 2% to 5%, or up to 0.5V, the least of the two.

When not used, connect **SENSE 1** to **OUT 1** and **SENSE 1 RTN** to **OUT 1 RTN**. These pins can be tied internally if not required, to avoid adding this external connection – *consult factory*.

M6204 DC/DC POWER SUPPLY

Pin Assignment

Connector type: M24308/24-40F or eq.

Mates with: M24308/2-4F or eq.

Pin No.	Pin Function		Pin No.	Pin Function		Pin No.	Pin Function	
1	CHASSIS		14	INHIBIT		27	OUT RTN (-)	
2	OUT (+)		15	N.C.		28	OUT RTN (-)	
3	OUT (+)		16	VIN (+)		29	OUT RTN (-)	
4	OUT (+)		17	N.C.		30	OUT RTN (-)	
5	OUT (+)		18	VIN RTN (-)		31	SYNC	
6	OUT (+)		19	VIN RTN (-)		32	N.C.	
7	OUT RTN (-)		20	OUT (+)		33	N.C.	
8	OUT RTN (-)		21	OUT (+)		34	VIN (+)	
9	OUT RTN (-)		22	OUT (+)		35	VIN (+)	
10	OUT RTN (-)		23	OUT (+)		36	N.C.	
11	SENSE RTN (-)		24	OUT (+)		37	VIN RTN (-)	
12	SENSE (+)		25	OUT RTN (-)				
13	SIGNAL RTN		26	OUT RTN (-)				

Note: All output parallel pins should be connected together for best performance.

Typical Connection Diagram

The drawing shows the mechanical specifications for the M24308/24-40F capacitor. The top view (left) shows a rectangular component with a central pin array. Key dimensions include a width of 0.38 ± 0.02 inches [9.68 ± 0.51 mm], a total width of 0.75 inches [19.00 mm], and a pin pitch of 0.14 inches [3.50 mm]. The side view (right) shows a height of 0.54 inches [137.16 mm] and a total height of 0.512 inches [130.16 mm]. The drawing also indicates a heat dissipation area, a central pin array (M24308/24-40F OR EQ.), and a name plate (M24308/26-1 (OR EQ.) 2 PL.). Other dimensions include a pin diameter of 0.025 inches [6.30 mm], a pin length of 0.13 inches [3.20 mm], a pin spacing of 0.28 inches [7.00 mm], and a pin radius of 0.14 inches [3.50 mm].
