

CTF-QUADRAX BASED MEDIA CONVERTER SOLUTIONS

PDS-285

DESCRIPTION

CTF-Quadrax technology is the embedding of a transmit or receive optical sub-assembly into a Quadrax contact. Quadrax is a size 8 keyed contact with 4 or 8 pins used in high speed copper signaling applications. The embedding of a TOSA/ROSA into this component provides the ability to utilize a Quadrax connector for media converter applications. ROSA/TOSA components are available in all major fiber protocols to include 850nm multi-mode, 1300nm multi-mode (typically used in 100-Base-FX applications), 1310nm single mode, and other varieties for support of a plethora of interfaces customers are utilizing in platforms and systems.

STEPS TO CONFIGURE A COMPONENT:

1. Determine Requirements

What interfaces need conversion?

What specific copper/fiber protocols are being used?

- **Ethernet copper** - Ex: SGMII, 100/1000-Base-KX, XAUI
- **Ethernet fiber** - Ex: 100-Base-FX, 1000-Base-LX/EX/SX
- **Others** - Ex: DVI, PCI-Express, Fiber Channel, SDI, HD-SDI, 3G-HD-SDI, Other

How many channels of each?

For each channel, is a TX/RX pair needed or just RX or TX?

2. Determine Shell Size of Converter

- SS 25 - 8 cavities; 23-6; 19-4; 17-2; 9-1
- Determine, on each cavity, which interface goes where
- Determine Samtec HQDP style - straight/right angle mount, shielded, length of HQDP ribbon

2. Determine Special Requirements

- Di-electric or metallic insert?
- Sealing behind 38999? What Level of Hermeticity?
- Shell Material : Stainless Steel or Aluminum
- Plating needed, rotations

ACTIVE COMPONENT OPTIONS

Part Number	Wavelength	Mode	Max Speed
CF-170900-000	850nm VCSEL	MM	4.25 Gbps Tx
CF-170900-001	850nm PIN + TIA	MM	4.25 Gbps Rx Encoded
CF-170900-020	850nm PIN + TIA	MM	4.25 Gbps Rx Pathological
CF-170900-024	1310nm LED	MM	125Mbps Tx
CF-170900-025	1310nm Photodiode	MM	125Mbps Rx
CF-170900-010	1310nm DFB Laser	SM	2.5 Gbps Tx
CF-170900-011	1310nm Photodiode	SM	2.5 Gbps Rx

Shell Size 17 - 2 Locations

Shell Size 19 - 4 Locations

Shell Size 23 - 6 Locations

Shell Size 25 - 8 Locations

KEY MECHANICAL DIMENSIONS

- Max width dimension is .895 inches
- Samtec ribbon length is per customer request
- Shell size grows as customer uses larger configuration (from size 9 up to shell size 25)

EXAMPLE: CF-020010-348

2TX, 2RX 850nm/1300nm MM

- 1Tx, 1Rx 850nm conversion for multi-mode fiber up to 4.25Gbps
- 1Tx, 1Rx 1300nm conversion for multi-mode fiber up to 125Mbps
- Specific application is Ethernet for 1000-Base-SX and 100-Base-FX protocols
- Shielded and grounded Samtec HQDP ribbon
- Passivated stainless steel

EXAMPLE: CF-020010-64N

2TX; 5RX 850nm MM

- 2Tx, 2Rx 850nm conversion for multi-mode fiber up to 4.25Gbps
- 3Rx 850-nm conversion for multi-mode fiber up to 4.25Gbps for pathological data
- Specific application is Ethernet for 1000-Base-SR and 3G-HD-SDI
- Samtec HQDP ribbon
- Durmalon plated aluminum shell
- Ground plane metallic insert

EXAMPLE: CF-020010-900

4TX 850nm MM

- 4Tx 850nm conversion for multi-mode fiber up to 4.25Gbps
- Specific application is multi-mode fiber for DVI copper/fiber conversion
- Samtec HQDP ribbon
- OD-Cad plated aluminum shell

EXAMPLE:

CF-020010-275

TX, 1RX 850NM MM

- 3Tx and 1Rx 850nm conversion for multi-mode fiber up to 4.25Gbps
- Specific application is multi-mode Ethernet and SFDP connections
- Samtec HQDP ribbon
- OD-Cad plated aluminum shell

HOW TO CONFIGURE A PLUG

CTF-QUAD MATING PLUG

Ordering procedure is shown below using part number CTF-5P96A1-000N
(kit with connector and appropriate number of A801 cavity adapters)

1.	2.	3.	4.	5.	6.	7.
Connector Type	Material	Quadrax Contact	Finish	Shell Style	Shell Size - Insert Arrangement	Rotation
CTF	5	P	Z	6	A1	N

1. Connector Type

	Designates
CTF	Copper to Fiber Product Family

2. Select A Material

	Designates
5	Aluminum Shell
6	Composite Shell
8	Stainless Steel Shell

3. Quadrax Contact

	Designates
P	Quadrax Size 8 Contact Adapter for ARINC 801 Contact

4. Select a Finish

	Designates
T	Aluminum Durmalon
Z	Aluminum Black Zinc Nickel
F	Aluminum Electroless Nickel
M	Composite Electroless Nickel
W	Aluminum OD Cad
J	Composite OD Cad
L	Stainless Steel Electrodeposited Nickel
Y	Stainless Steel Passivated*

*environmental only-not hermetic
Note: There is not a Mil-Spec finish for environmental passivated steel-only hermetic, hence the asterisk.

5. Select a Shell Style

	Designates
6	Straight Plug

Note: No Stand-off, accessory threads

6. Select A Shell Size - Insert Arrangement

	Designates
A1	9-5
E2	17-52
F4	21-75
H6	23-6
J8	25-8

7. Select a Rotation

	Designates
N	Normal
A	
B	
C	
D	
E	

TECH SPECS

RUGGED RS-422 CONCENTRATOR

Power	13V-32-V DC power interface; 5 Watts Max
Copper RS-422	6 fully compliant optically isolated interfaces for concentration; 1 fully compliant optically isolated interface for built-in-test and diagnostics
Ethernet Fiber Connectivity	1 transmitter; 1 receiver 850nm multi-mode 1Gbps transmitter/receiver Min power output -4dBm; Max receiver sensitivity -20dBm

Temperature

- Operating Temperature - Thermal Cycles between -40°C and 85°C while device is operating
- Temperature is measured at chassis housing or card edge
- Storage Temperature - Thermal Cycles between -55°C and 125°C

Humidity

- Operating Humidity – Humidity cycle between 0-100% non-condensing humidity while device is operating
- Storage Humidity – Humidity cycle between 0-100% condensing humidity

Sealing

- Sealing can be optionally provided at the MIL-DTL-38999 interface with up to 10-5 cc/sec performance

Fluids Susceptibility

- MIL-DTL-38999 receptacle interface per EIA-364-10E

Vibration & Shock

- Sine Vibration – 10 g Peak, 5-2,000Hz
-Based on a sine sweep duration of 10 minutes per axis in each of three mutually perpendicular axes. May be displacement limited from 5 to 44 Hz, depending on specific test.
- Random Vibration - 0.005@5Hz, 0.1@15Hz, 0.1@2,000Hz
-60 minutes per axis, in each of three mutually perpendicular axes.
- 40 G Peak Shock Cycle
-Three hits in each axis, both directions, ½ sine and terminal-peak saw tooth, Total 36 hits.

Altitude

- -1,500 to 60,000 ft Altitude Testing w/ Rapid Depressurization

Electromagnetic Compatibility

- Designed to comply with MIL-STD-461E

Printed Circuit Board Assemblies

- Conformal Coat
-Amphenol performs Conformal Coating to both sides of printed circuit board assemblies using HUMISEAL IB31 in accordance with IPC-610, Class 3.
- Printed Circuit Board Rigidity
-Amphenol printed circuit boards are fabricated in accordance with IPC-6012, Class 3.
- Printed Circuit Board Fabrication
-Amphenol printed circuit boards acceptance criteria is in accordance with IPC-610, Class 3.

Reliability Predictions (MTBF)

- Amphenol can perform Mean Time Between Failure (MTBF) reliability analysis in full compliance with MIL-HDBK-217F-1 Parts Count Prediction and MIL-HDBK-217F-1 Parts Stress Analysis Prediction. We can also perform reliability analyses in full compliance of ANSI/VITA 51.1 if it is required or preferred over the later method.

Notice: Specifications are subject to change without notice. Contact your nearest Amphenol Corporation Sales Office for the latest specifications. All statements, information and data given herein are believed to be accurate and reliable but are presented without guarantee, warranty, or responsibility of any kind, expressed or implied. Statements or suggestions concerning possible use of our products are made without representation or warranty that any such use is free of patent infringement and are not recommendations to infringe any patent. The user should assume that all safety measures are indicated or that other measures may not be required. Specifications are typical and may not apply to all connectors.
